

We reaffirmed our commitment to the goal of an Asia-Pacific free of malaria by 2030, and welcomed ongoing efforts to implement proposed actions in the Asia Pacific Leaders' Malaria Elimination Roadmap, including the Flagship ASEAN-India Programme for Combating Malaria. We were pleased with the implementation of the Regional Artemisinin-resistant malaria Initiative (RAI) amongst the ASEAN Member States in the Greater Mekong Sub-region (GMS) together with southern China, in cooperation with other stakeholders such as the World Health Organization (WHO) and United Nations Office for Project Services (UNOPS).”

“... Commitment to the goal of an Asia Pacific free of malaria by 2030, we endorsed Asia Pacific Leaders’ Malaria Elimination roadmap as a framework . . .”

OUR PEOPLE, OUR COMMUNITY, OUR VISION,
10th East Asia Summit, Kuala Lumpur, 22 Nov 2015

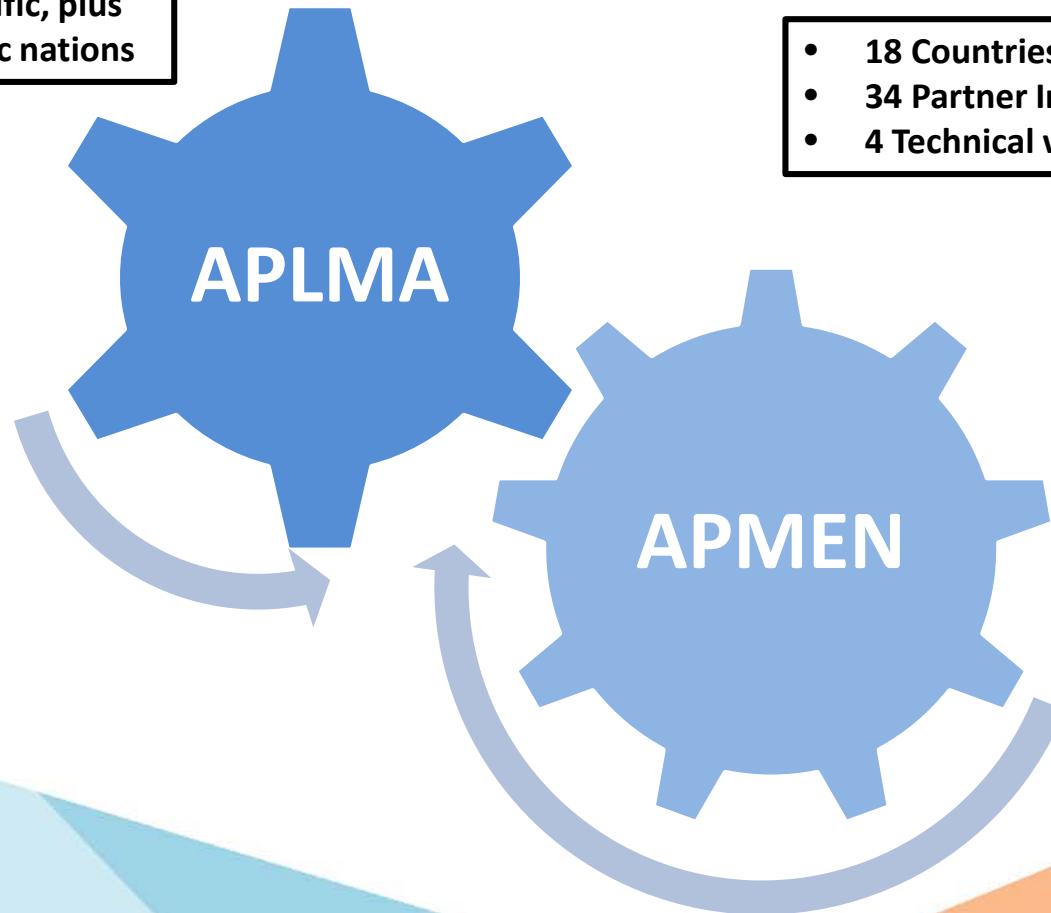

**Translate strong political
commitment into action
Brokering solutions and
maintaining leadership**

- **21 Endemic countries in
Asia and the Pacific, plus
EAS non-endemic nations**

**Integrate and complement
regional elimination efforts**

- **18 Countries**
- **34 Partner Institutions**
- **4 Technical working groups**

GOAL

Asia Pacific Free of Malaria by 2030

INTERMEDIATE
OUTCOME

Increased capacity of National Malaria Control Programs
to implement strategies leading to pre-elimination and elimination

Support
introduction
of g6pd
p.O.C.
Testing and
novel rdt's
for p.Vivax

Introduction
of strategies
to address
impediments
to safe and
effective
radical cure
of p.Vivax

Areas or
population
most
affected

Vector
Control

Program
Management

Asia Pacific Free of Malaria by 2030

Strategic Plan for 2017-2020

Objectives

1. Contribute to improved evidence and action
 - a. *P. vivax* diagnosis and treatment
 - b. Vector control
 - c. Surveillance and response
2. Facilitate and support work and action towards malaria elimination
3. Targeted human resource capacity development
4. Maintain network of stakeholders

Functions

- **Address critical barriers** of direct programmatic relevance
- **Adapt and respond** to changing malaria landscape and priorities
- Continue to **provide an open forum for collaboration**
- **Communicate** what is needed in simple, practical and actionable terms
